

Diagram illustrating text alignment and relative width calculation across three examples:

- Example 1:**
 - Yellow box: "Hello Gopher!" (Relative Width=10%) and "er!" (Relative Width=10%).
 - Blue box: "Relative width=20%" and "Relative width=30%".
- Example 2:**
 - Yellow box: "Hello Gopher!" (Relative Width=10%) and "!" (Relative Width=10%).
 - Blue box: "Relative width=20%" and "Relative width=30%".
- Example 3:**
 - Yellow box: "Hello Gopher!" (Relative Width=10%).
 - Blue box: "Relative width=20%" and "Relative width=30%".

MOST of the adventures recorded in this book really occurred; one or two were experiences of my own, the rest those of boys who were schoolmates of mine. Huck

MOST of the adventures recorded in this book really occurred: one or two were

MOST of the adventures recorded in this book really occurred; one or two were experiences of my own, the rest those of boys who were schoolmates of mine. Huck Finn is drawn from life; Tom Sawyer also, but not from an individual--he is a combination of the characteristics of three boys whom I knew, and therefore belongs to the composite order of architecture.

The odd superstitions touched upon were all prevalent among children and slaves in the West at the period of this story--that is to say, thirty or forty years ago.

Although my book is intended mainly for the entertainment of boys and girls, I hope it will not be shunned by men and women on that account, for part of my plan has been to try to pleasantly remind adults of what they once were themselves, and of how they felt and thought and talked, and what queer enterprises they sometimes engaged in.

and thought and talked, and what queer enterprises they sometimes engaged in.

what they once were themselves, and of how they felt
and thought and talked, and what queer enterprises they
sometimes engaged in.

Width=130		

A diagram illustrating text alignment and width percentages. It features a yellow background with a blue border. The text "Hello Gopher!" is displayed in red. Below it, the text "Hello Gopher!" is repeated in black, followed by "Relative Width=10%". To the right, the text "width=20%" is shown in red, and further right, "n=30%" is shown in black. The diagram uses these elements to demonstrate how different widths and alignments affect the visual presentation of text.

The diagram illustrates the concept of relative width in CSS. It shows a series of nested boxes. The outermost box is yellow and contains the text "Hello Gopher!". Inside this box is a green box, which also contains the text "Hello Gopher!". Inside the green box is a smaller white box, which contains the text "Hello Gopher!" and "Relative Width=10%". The boxes are nested to show how a relative width of 10% is calculated based on the width of the containing box.
